

Unique Qualities For A Full Range Of Applications

Since 1946 Hy-Tape® International has kept devices and dressings secure with less changing and irritation, so skin remains healthy and intact.

For Health Care Professionals and Hy-Tape® The Original Pink Tape, there's always been a genuine comfort level. And with good reason. No other surgical tape sizes up to the formidable array of easy working properties neatly into every product.

Hy-Tape® is durable, yet flexible, so it's perfect for extended wear while it gently accommodates underlying tissue shifts. It saves time by eliminating the need for skin prep and dramatically reducing the need for dressing changes for wound care, plastic surgery and ostomy securement. Although no skin prep is required for application, skin must be initially clean & oil free. Hy-Tape® will then remain in place in the presence of drainage, perspiration, humidity, and oily skin. It's thin and flexible, conforms to body contours, and remarkably, it's just as easily removed from sensitive post-operative skin. Hy-Tape® is Latex-free, zinc oxide based and non-allergenic.
