

## **MATERIAL SAFETY DATA SHEET**

### **Pressure Sensitive Tape Products**

#### **SECTION 1: Product Information**

##### **Product Description:**

A tinted film coated with a highly pigmented synthetic rubber adhesive.

#### **SECTION 2: Hazardous Components**

The above listed products may contain one or more hazardous chemical components. However, due to their incorporation into the structure of the products, exposure to such components is not anticipated under normal conditions of use. See section 16 for further discussion.

#### **SECTION 3: Description of Hazards**

Exposure to hazard of chemical components is not anticipated during normal use. MSDS for individual components are available upon request.

#### **SECTION 4: First Aid Measures**

Clean and dress wound if cut by product edge. There are no known acute, immediate effects requiring treatment as a result of the use of this product as supplied.

#### **SECTION 5: Fire-Fighting Measures**

All extinguishing chemicals and methods are applicable (i.e dry chemical ,carbon dioxide). Self-contained, positive pressure breathing apparatus should be used if available in fire conditions. Fire or very high temperatures (not normal conditions of use) can cause release of toxic smoke and fumes (carbon dioxide, carbon monoxide, various hydrocarbons, etc.)

#### **SECTION 6: Accidental Release Measure**

Not applicable

#### **SECTION 7: Handling and Storage Guidelines**

Use care to avoid paper cuts from sheet edges. No other special handling or storage precautions apply in respect to potential hazards. The product is considered an article which does not release, or result in the exposure to a hazardous chemical, under normal use. Store at 70°F +/- 5°F at 50% humidity.

#### **SECTION 8: Exposure Controls and Personal Protection**

None required in normal use. Follow company procedures.

## **MATERIAL SAFETY DATA SHEET**

### **Pressure Sensitive Tape Products**

#### **SECTION 9: Physical and Chemical Properties**

Product is a manufactured article in the form of a flexible sheet, strip, or roll. Contains some combination of two or more of the following major material components: paper, plastic film, aluminum foil, reinforcing yarn, fabric, adhesive.

#### **SECTION 10: Stability and Reactivity**

Hazardous decomposition will occur only under fire conditions. Various harmful compounds could be formed during combustion. No hazards associated with normal use.

#### **SECTION 11: Toxicological Information**

Although hazardous chemicals may be used in this product, exposure to those chemicals and possible hazardous effects will not occur with the product in this form, in normal use. MSDS for individual hazardous chemicals can be supplied upon request by contacting Hy-Tape International, Inc. at 1-800-248-0101.

#### **SECTION 12: Ecological Information**

The anticipated instances of release into the environment would be during disposal of the end use item, of which this product could be a part, or waste during use. Other than the paper components, the materials of construction are very resistant to biodegradation and are not water soluble.

#### **SECTION 13: Disposal Considerations**

Dispose of per appropriate local regulations. Product is not recyclable.

#### **SECTION 14: Transport Information**

No special procedures required. Product is considered non-hazardous.

#### **SECTION 15: Regulatory Information**

No known regulations apply.

#### **SECTION 16: Other Information**

**NFPA Hazard Classification: Health: 0 Flammability: 1 Reactivity:0 Special Hazards: None**

Per the code of the Federal Regulations 1910.1200, this product is considered by Hy-Tape International, Inc. to be an *article*, defined in the regulation as “a manufactured item other than a fluid or a particle: (i) which is formed to a specific shape or design

## **MATERIAL SAFETY DATA SHEET**

### **Pressure Sensitive Tape Products**

during manufacture; (ii) has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which does not release more than very small quantities, e.g., minute or trace amounts of hazardous chemical, and does not pose a physical hazard or health risk to employees.”

Although this product may contain hazardous components, we do not believe those hazards are present as manufactured or when used. Since the product meets the definition of an article, it is technically not subject to this regulation or MSDS reporting. This document is provided for informational purposes, and is not meant to imply that this product is hazardous.
